

BMD Testing Simplified Webinar

December 11, 2020 | 9:00 am to 12:00 pm

Balanced mix design (BMD) is the next level to asphalt mix design. To complete the design process correctly, lab performance testing must be conducted properly. Based on an analysis of the VTRC Round Robin Phase I data, many labs and technicians experienced problems in conducting the test. This three-hour webinar will outline the difficulties and explain the process of performing the IDEAL-CT.

To aid webinar participants, three testing equipment manufacturers will walk attendees through the process. Each participating lab is encouraged to prepare samples for IDEAL-CT before the webinar. The manufacturer's will discuss the proper testing procedure for their equipment and then labs will be given the opportunity to preform tests and return with questions for your given manufacturer. For those who have not purchase equipment, this will be a great opportunity to evaluate the different equipment.

**REGISTRATION ONLINE ONLY - VAASPHALT.ORG
COMPLIMENTARY WEBINAR, LINK PROVIDED WEEK OF WEBINAR**

<i>Time</i>	<i>AGENDA</i>
9:00 - 9:10 am	Welcome and Purpose of Webinar
9:10 - 9:45 am	VTRC BMD Round Robin Phase 1
9:45 - 10:00 am	BREAK
10:00 - 10:20 am	Troxler's Test Quip— Overview and Hands-On Demonstration
10:20 - 10:40 am	Humboldt—Overview and Hands-On Demonstration
10:40 - 11:00 pm	InstroTek—Overview and Hands-On Demonstration
11:00 - 11:30	BREAK/LAB TEST TIME
11:30 - 12:00	Live Question/Answer
12:00 pm	Webinar Review and Adjourn
